Why We Are Here

- Challenges
- Opportunities
- Vision

Challenges

- Evaluation experience is limited in most economies in Asia
 - Government initiatives do not include evaluation
 - Action plans or policy often focus only on implementation of policies and programs
 - Funding of data collection and evaluation of programs and policies is often not available or of low priority
 - Expertise (trained evaluators) is limited
 - Evaluation data are lacking or not standardized

Opportunities

- Economies are in the process of developing and implementing new policies on energy efficiency. There are opportunities to:
 - Introduce evaluation as part of the process
 - Increase expertise in governments for data gathering and evaluation (capacity building)
 - Increase the body of knowledge on the effects of energy efficiency policy and programs
 - Improve energy efficiency policy and program design and implementation

Vision

- Support the strengthening of evaluation leadership and capacity, especially in developing countries
- Foster the cross-fertilization of evaluation theory and practice in Asia
- Address international challenges in evaluation

Previous Activities

- October 2015: International Workshop for Asia Energy Efficiency Program and Policy Evaluation (Beijing)
